EDUCATION

Northeastern University

Sep. 2025 – Dec. 2028

B.S. in Computer Science and Business Administration

Oakland, CA

GPA: 3.88/4.0 (Overall), 3.91/4.0 (CS), *Dean's List*

Relevant Coursework: Object-Oriented Design, Artificial Intelligence, Programming Languages, Discrete Mathematics, Databases, Marketing, Accounting, Microeconomics

Upcoming Coursework: Finance, Business Statistics

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, Pyret, SQL (MySQL), Redis, MongoDB, HTML/CSS, PHP

Technologies: Node.js, Express, WordPress, REST APIs

Developer Tools: Git, Docker, Shell, VS Code, Visual Studio

Systems: Linux, macOS, Windows

EXPERIENCE

Northeastern University

May 2026 – Present

Undergraduate Teaching Assistant (CS 3200)

Remote

- Supported an online database course covering SQL, relational modeling, and normalization for **110+ students**.
- Held office hours to help students debug SQL queries and schema design issues.
- Graded assignments involving ER modeling and MySQL implementations, providing feedback on correctness and design quality.

Uniplex Host

Apr. 2024 – Present

Founder & Systems Engineer

Remote

- Built and operated a Docker-based hosting platform serving **40+ clients** across **65+ active services**, offering VPS, game servers, and bot hosting across U.S. nodes, with automated provisioning and billing integrations via WHMCS APIs enabling scalable service lifecycle management.
- Maintained **99.9% uptime** across all production services with **24/7 SLA-backed containers**, supported by Nginx reverse proxy configuration, real-time status monitoring, and automated recovery mechanisms.
- Managed multi-node Linux infrastructure with optimized compute and memory allocation, operating a full service suite including a game panel, web panel, status page, and documentation portal.

Northeastern University

Jan. 2026 – Apr. 2026

Undergraduate Research Assistant

Oakland, CA

- Supported a City of Oakland–Northeastern University partnership evaluating responsible AI adoption in local government, focusing on Microsoft Copilot's effectiveness and risks in scaling community support services.
- Analyzed IRB-approved survey and usage log data to assess how prompt engineering skills evolve with AI tool exposure and what drives user trust vs. over-reliance.
- Coded and labeled qualitative interview transcripts to surface themes around data privacy challenges and equitable AI use in the Oakland context.
- Conducted literature reviews and identified AI product features to improve safety, equity, and usability for city government workflows.

PROJECTS

AshBot | *Discord API, JavaScript, Node.js, MySQL, Redis*

July 2023 – Feb. 2026

- Architected and deployed a Node.js backend serving **1,200+ Discord servers** and **250,000+ users**, implementing event-driven asynchronous command handling for high-concurrency workloads.
- Built a broad feature suite including moderation, auto-roles, giveaways, ticketing, suggestions, sticky messages, minigames, and AI-powered responses, with frequent updates and new features shipped based on community feedback.
- Designed an indexed MySQL data layer with Redis caching to reduce database load and improve response latency under peak traffic; migrated from a single-process deployment to a sharded, containerized Docker architecture on Linux VPS infrastructure.
